Wireless Control for Leisure Boats

New wireless remote control for Marex ECS from Aventics

Owners of small leisure and work boats with fixed pitch propellers can now dock and undock even easier. The AVENTICS Marex ECS is supported by remote control company Yacht Controller resulting in a solution that can be connected via plug and play. Even mechanically actuated motors can be controlled wirelessly.

Laatzen, Germany, September 25, 2018 – It holds nicely in your hands and can be used from anywhere on the deck: the control panel that forwards commands to Marex ECS via radio waves. "We want to make it even easier for our customers to maneuver their boats – and not just on large yachts," states Christian Lader, Product Manager Ship Controls Marine at AVENTICS. Another advantage: Previously, boat owners with mechanically actuated motors could not retrofit a remote control. The experts from AVENTICS and Yacht Controller have now closed this gap. The Dual Band plus remote control from Yacht Controller provides users with a simple, intuitive control for engines, bow thruster, stern thruster, and two anchor winches that can easily be retrofitted.

About Aventics

Aventics is one of the world's leading manufacturers of pneumatic components and systems. The pneumatic engineering company provides products and services for industrial automation, as well as the food, packaging, medical, and energy technology industries. The company also develops solutions for the commercial vehicles, marine, and railway technology sectors.

By integrating electronics, the use of state-of-the-art materials, and focusing on machine safety and the Internet of Things (I4.0), Aventics is a pioneer in applied and environmentally-friendly solutions. Aventics is preparing for the future by expanding its approach to digitalization.

With around 150 years of expertise in pneumatics, Aventics employs over 2,000 associates worldwide. From production sites in Germany, France, Hungary, the USA, and China, Aventics markets its products in over 100 countries through direct sales and sales partners. The Aventics Group has received multiple certifications, including ISO 9001 and ISO/TS 16949 for quality, ISO 50001 for energy management, and ISO 14001 for environmental management.
